

MRS. BRITSCH'S AND MS. VOKE'S 4TH-GRADE CLASS

October

Math Facts

You can help your child increase their proficiency in math while also helping them prepare for 5th grade simply by practicing their multiplication facts with them daily. The students each have a set of facts individualized for their level, and they can keep a set at home if desired.

Your child can also practice using regular flash cards purchased at many stores or using one of the many online practice games.

Contact Me!

Remember, you can feel free to contact me at home or school about anything that concerns math class. If you call after school, please call before 8:30 pm. My cell phone number is 1-937-470-5426.

You can also contact me through email at lbritsch@gcswave.com

Math

In math this month we will continue to practice multiplication algorithms and problem solving for all four operations, while also introducing more advanced multiplication and division. The following learning targets are the concepts students will be able demonstrate by the end of the month:

I can solve multiplication word problems.

I can find factors.

I can find multiples.

I can use distributive property to solve multi-digit multiplication.

I can use strategies to solve word problems.

Science

I can identify the layers of earth.

I can learn about volcanoes.

I can learn about earthquakes.

I can explain different types of natural disasters.
